

Giken Sakata (S) Limited

New Agreements and Higher Production Figures

This morning, Giken announced that it has won two cooperation agreements with PT Sarana Patra Jateng. The agreements will allow Giken to produce oil from an additional 70 wells which are located around Central Java. We expect the terms of the new agreements to be similar to that of the other three oilfields and the mother agreements (for the two new contracts) with Pertamina will expire in Dec 2016. That said, we also expect Giken to extend the operating rights of these new fields before they commit any capex.

Giken also updated their production figures which stood at 880 barrels per day as of mid-Sep vs 670 barrels as of end June. The figures are largely in-line with our estimates and we expect the rate of increase of output to double with the help of the second rig.

We are retaining our forecast tentatively and continuing to price the company at S\$0.450 per share. **Potential Gem.**

Room for Growth: Giken won the two new agreements shortly after they secured the operating rights for the Kawengan field in June 2014. We are impressed by their ability to acquire new agreements at such a quick pace and we anticipate the management to continue searching for potential targets. Such competency may lead to upside risk from our existing valuation.

Drilling Update: Giken is now producing about 880 barrels per day, in line with our estimate of about 18 wells and each producing about 50 barrels of crude oil per day. We are retaining our FY15 target of about 60 operating wells.

Potential Gem

- Potential Price S\$0.450
- Last Price S\$0.345

Main Activities

Giken Sakata (S) Limited (Giken) is an integrated contract manufacturer that provides precision machining and engineering services mainly for the electronic industry. The company intends to diversify into the O&G sector via acquiring 53.7% stake in Cepu Sakti Energy Pte Ltd (Cepu).
